

① Conditional / event handling in classic Dashboard.

② Prediction Concept.

③ Splunk MTK.

④ DBConnect

⑤ Window / time ingestion pieces

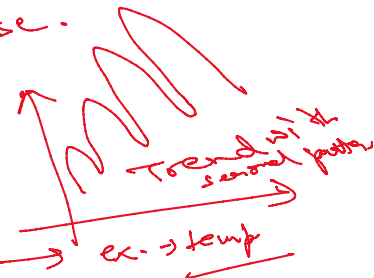

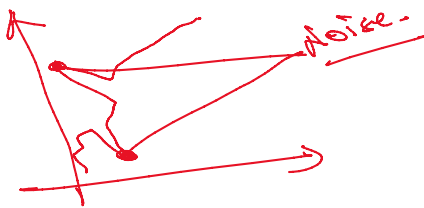

① Conditional / Event Handling classic Dashboard

② Predict :-

one or more time series data. → Avg. of the value
→ level → increase/decrease.
→ trend → increase/decrease.
→ seasonality → short term cycle of the series.

TimeSeries → Systematic (Pattern)
→ Non-Systematic.
→ Noise.

TimeSeries → Univariate → Only one variable → ex. → temp
→ Multivariate → More than Variable
→ 3 axial accelerometers
x, y, z

LL → local level
LLT → local level Trend
LTD → local level Trend & Season
